

Completely self-contained, wireless, multi-patient telemetry system does not require any external infrastructure

Instantly deployable multi-patient monitoring for any medical tent or major event

SURGECASE WVSM® PORTABLE CHARGING STATION

Manage multiple patients and multiple monitors with the WVSM *SurgeCase/10*. SurgeCases are designed and built specifically for the charging, storage and deployment of Athena GTX Wireless Vital Signs Monitors and ancillary equipment.

Smart charging technology embedded in each SurgeCase ensures that WVSMs and peripheral devices (such as tablets) are properly charged and ready to go at a moment's notice. Temperature controlled cooling blowers ensure the case operates at a safe temperature while deployed as well as while charging in storage.

Each SurgeCase/10 features:

- Up to ten (10) WVSMs + all consumables
- One (1) iPad mini (optional)
- Hard Case with integrated charging capability
- Multiple case colors available
- No outside infrastructure required
- Packs can be configured with additional medical supplies
- Available for purchase or lease

SURGECASE/10 FEATURES

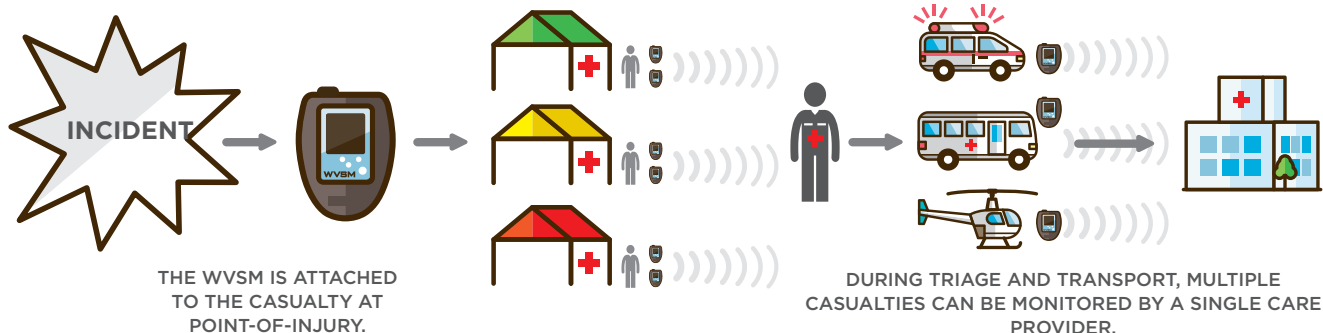

- LED indicator lights display battery status of each individual monitor
